REALISTIC ADAPTIVE INTERACTIVE

RAILS

LEARNING SYSTEM

For More Information: training@spectrallabs.com / 858-207-3727, press 1 for RAILS support team

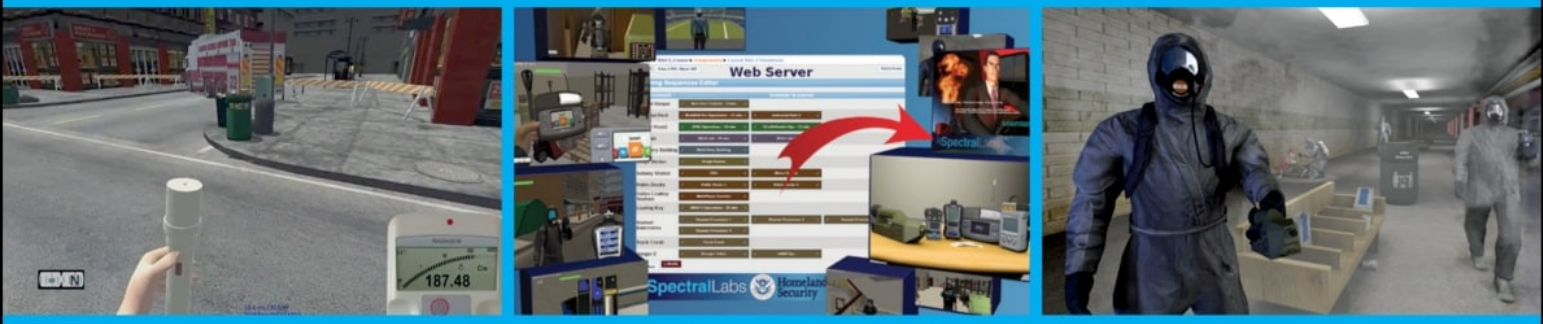

RAILS is a computer-based training package for first responders and other professionals who utilize HAZMAT devices as part of their job. Trainees control PC-simulated avatars and Rad/Nuc/Chem/Ex detectors in a wide variety of realistic, hazardous virtual environments. Simulated instruments respond accurately to chemical and radiological threats, and retain the familiar control of the real-life devices. RAILS comes with a complete learning management system, and enables instructors and administrators the ability to tailor training courses to cover topics most relevant to their group, while also affording the ability to change the simulated threats and selectable equipment within the virtual environments.

**TRAINING
FOR 20+
DEVICES!**

“Unique interactive immersive simulation-based training where, when, and how you want it. RAILS is a great way for a first responder to refresh HAZMAT equipment skills.”

*-Nick Vent, San Diego County
Hazardous Incident Response Team (Ret)*

SYSTEM REQUIREMENTS

- OS: WINDOWS 7 / 8 / 10
- PROCESSOR: 2.4 GHZ MULTI-CORE
- RAM: 2 GB, 512 MB FREE
- HDD SPACE: 2.5 GB
- DIRECTX 9.0C OR ABOVE
- KEYBOARD & MOUSE W/ SCROLL WHEEL
